Upon examination, the child was determined to be in critical condition that required intubation and life saving measures. There were no other children in the home. The allegation of neglect pertaining to the father, Bodie Ence, was substantiated based on his failure to provide supervision, despite being aware of the child's prior suicide attempts, resulting in the child accessing a loaded firearm. A subsequent report involving Mr. Ence, another adult and the near-fatality victim was received on May 17, 2023, regarding neglect that occurred prior to the child coming into care. The allegation was unsubstantiated and the child was assessed as safe with the other parent.

Additionally, in accordance with the DCS Strategic Plan for State Fiscal Year 2016 (FY16), multidisciplinary team (MDT) reviews of fatality and near fatality cases were implemented during the first quarter of FY16. The MDT reviews fatality and near fatality cases with prior DCS involvement, which are a key feature of the Strategic Plan and supports the objective of increasing the accuracy of safety and risk assessments in investigations.

Cases are reviewed by the MDT in order to identify any systemic factors, both internal and external to the Department that may have had an impact. The Department uses the aggregate data gathered through all of the MDT reviews to assess and guide future changes and/or recommendations to policies, practices, rules or statutes. Findings from these reviews are compiled into an annual report to be shared on the DCS website. The target date for release of the next report is December 1, 2024.
