DEPARTMENT OF CHILD SAFETY

Semi-Annual Progress Report (Reducing Out-of-Home Children, Long-Term Cases and Inactive Cases)

Report Date: February 28, 2023 Reporting Period: SFY2023, December 2022

Introduction

Pursuant to Laws 2022, Second Regular Session, Chapter, 313, Section 17, the Arizona Department of Child Safety (DCS) is required to continue this report semi-annually for data through December 2022. The Department is required to provide this report by February 28, 2023 for the period ending December 2022 and again in August 2023 for the period ending June 2023. Section 17 now requires the Department report the total number of long-term cases defined as any case in which the child has been in an out-of-home placement for at least eighteen months.

PROGRESS SUSTAINING OPEN REPORTS, INACTIVE CASES, & IMPROVING CASELOADS

DCS maintained the inactive cases well below the legislative benchmark of 1,000 since April 2017. Regrettably, the inactive cases rose above the benchmark during the prior period, largely attributable to barriers in Guardian with closing assessments. In March 2017, DCS fell below the legislatively required benchmark of 1,000 inactive cases. From a peak of 16,014 in January of 2015 to 1,579 in December 2022 which is a 90 percent decrease. While this still represents a significant decrease from March 2017, the Department has been addressing inactive cases to return below the benchmark of 1,000. To achieve this and to help improve caseloads, the Department uses performance management and other elements of the management system.

The Department achieved the original benchmark of less than 13,000 open reports six months ahead of the established target date in December 2016 when it reduced the number of open reports to 9,611. From a peak of 33,245 open reports in April 2015, the Department reduced that to 10,153 as of December 2022 (see Table 1), representing a 70 percent decrease. The benchmark was decreased to 8,000 starting the first quarter of SFY19 below which the Department remained each reporting period until the third quarter of SFY21. This is primarily attributed to the transition from the previous child welfare information system (CHILDS) to the new system (Guardian) in early 2021. Additionally, the Department experienced an increase in reports to the Arizona Child Abuse Hotline as children returned to school and other settings in which mandated reporters now have more contact with potential victims. From July 2020 through December 2022, the Department averaged approximately 8,481 open reports; just slightly over the benchmark.

Like most other industries, DCS was challenged by the "Great Resignation". As employers across the state and nation struggle to not only retain employees but also recruit and hire staff in the current environment, DCS has sought to strategize actions that might help address this challenge and minimize its impact. DCS offers telecommuting and/or a virtual work environment for staff for whom it is appropriate given their work duties. Additionally, DCS implemented a practice of offering staff who resign the ability to become temporary workers who are called to work on targeted activities or specific shift work (e.g. Hotline, after-hours investigation, or placement administration). This helps to reduce the impact of resigning staff and still have experienced resources willing to assist with critical duties.

DCS HR continues its efforts to hire and place DCS Specialists at a rate equal to or greater than departures from the Department. Sustained staffing levels help contribute to the reduced number of inactive cases, total open reports, and foster care population. Recently, the Arizona Legislature provided a much needed ten percent wage increase for state employees that was effective in July of 2022. Additionally, field staff (child safety specialists, case aides, supervisors and other field staff) were provided a one-time ten percent Critical Services Pay in December 2021 while remaining staff (i.e. non-field staff) received a five percent Conditional Retention pay in June 2022.

During SFY22 through the second quarter of SFY23, DCS HR maintained an Indeed subscription to conduct resume searches and post ads to increase applicant submission as well as seeking out potential candidates. Onsite job fairs for specific Regional field offices have been conducted. Additionally, DCS engaged a campaign for ads in the Payson Roundup, city newspapers throughout Maricopa County, radio station ads, Facebook,

and HelpWanted to increase exposure. DCS also targeted high needs areas such as Apache Junction and Case Grande with billboard ads. Streaming audio ads on Spotify were utilized. Finally, a plethora of outreach efforts and digital displays on numerous media platforms, Google, social media apps and websites were conducted. In CY2021 alone, DCS received 3,013 resumes out of which 2,302 were shortlisted for consideration and 607 staff were hired from these efforts.

PROGRESS MADE REDUCING THE OUT-OF-HOME POPULATION

The Department continues its efforts to maintain a safe reduction in the historical out-of-home foster care population. The Department achieved a decrease in the number of children and youth in OOH care from 12,595 in June 2022 to 11,722 in December 2022. The total OOH population includes all youth ages zero (0) through the age of twenty (20). The number of children entering OOH care has also declined. For example, 1,788 children entered care during the first quarter of SFY23 but 2,173 children exited care during the same quarter. Additionally, the number of children entering OOH care during the current reporting period (3,340) was less than the number of children entering care in the prior reporting period (3,500). The Department is now below the established legislative benchmark of 13,964 for children in OOH care. While safely decreasing youth ages 0-17 in OOH care is paramount (currently 10,911), the Department continues to encourage youth ages 18-20 to enroll in the extended foster care to benefit from the supports and resources available to them as they transition into adulthood. The number of youth in extended foster care was 879 in December 2022. The Department has been intentionally seeking an increase for this particular population. A strategic initiative was implemented to expand the successful transition of youth to adulthood, which includes providing more youth over the age of eighteen with independent living services and supports. Additionally, the Response and Relief Supplemental Appropriations Act passed in 2020 permitted states to allow qualified young adults to utilize Title IV-E funds on housing, education, employment and other needs. DCS partnered with Grand Canyon University to offer a best-in-class scholarship for youth aging out of foster care. The scholarship maximizes federal Pell Grant and tuition voucher funds, plus a generous scholarship from GCU that includes year-round housing and a meal plan. DCS assists with independent living funds as well, making it possible for our youth to graduate with a college degree debt-free. An on-campus job plus mentoring and tutoring will also be offered to these scholars.

By slowing the entry rate and sustaining performance for children exiting care, the Department has been able to maintain a safe reduction of the foster care population ages 0-17 since its historical high of 18,007 in 2016 to 10,911 in December 2022 representing a 39 percent decrease. The reduction in the number of children in out-of-home care is the result of several factors, including but not limited to, additional standardized process tools including supervisory administrative and case progress review checklists, standardized safety discussion guides, and training staff to better engage a family's network to maintain children safely in the home. Additionally, The Department received technical assistance from Action for Child Protection and the Capacity Building Center for States for development and implementation of the Atlantic Coast Child Welfare Implementation Center coaching model. DCS developed its Supervision Coach program that supports practice fidelity in safety assessment and clinical case management. Improved response times contribute to the reduction of children entering care as this enables DCS Specialists to make decisions that will help support families, provide services in a timely manner and avoid entry into care. In addition, this safe reduction in the number of children in out-of-home care is highlighted by no significant change in the re-entry rate for children who left care within the past 12 months.¹

Through the continued application of monthly clinical staffings on reunification cases using a standardized process, ongoing workers have been able to maintain the rate of children exiting care. By way of these standard process activities, the Department has safely maintained a reduction of the out-of-home care population during SFY2020, SFY2021, SFY2022 and SFY2023.

Footnotes

Tables 2 and 3 show the caseload by section (field office) for investigations, out-of-home children, and in-home cases. Investigations are the number of open reports assigned to each office. Out-of-home represents the number of children in ongoing cases assigned to each office. In-home cases represent the number of cases assigned to each office.

¹ Number of inactive cases is the actual figure as of the last day of the reporting period.

² As a result of Laws 2019, 1st Regular Session Ch. 263, Sec. 141 which continued this report, the benchmark established by the Legislature for number of out-of-home children was no longer based on a 2 percent reduction but a static number of 13,964.

³ Pursuant to Laws 2022, Second Regular Session, Chapter, 313, Section 17, this metric(number of out-of-home children) is no longer required. Therefore, the benchmark has been removed. However, the Department will continue to report the total number of children in out of home care since it is needed for caseload determinations.

⁴ Pursuant to Laws 2022, Second Regular Session, Chapter, 313, Section 17, this metric was added to this report. Long-term case means any case in which the child has been in 20 an out-of-home placement for at least eighteen months. The benchmark is the case load reported for December 2022. Therefore, the benchmark for the February 2023 iteration of this report will be the actual for December 2022.

⁻ In Home (IH) cases are based on a hand count of cases actively managed in each respective Region.

⁻ Maricopa East, Maricopa West and South Regions employ specific IH units who manage IH cases only. Northwest Region has two units assigned to manage IH cases, Northeast Region has mixed units that may carry IH, Investigations and/or OOH cases. Section 11 in South Region (Yuma) has workers assigned to carry IH cases.

⁻ During SFY2022, methodology of utilizing a 50/50 split for determing FTE assignments for investigation and ongoing Child Safety Specialists at the Section level was discontinued. Specific assignments are now based on the designations of their specific role as denoted in HRIS. However, Specialists in a trainee status are accounted for in FTE figures in each section with an equal distribution of 66% caseload. Filled FTE only includes case-carrying DCS Specialists and does not include Specialists assigned to the Child Abuse Hotline or Statewide Placement Administration.

⁻ As of Q1 SFY 2019, Specialists in a trainee status are accounted for in FTE figures in each section with an equal distribution of 66% caseload.

⁻ In Home (IH) cases are based on a hand count of cases actively managed in each respective Region.

⁻ Maricopa East, Maricopa West and South Regions employ specific IH units who manage IH cases only. Northwest Region has two units assigned to manage IH cases, Northeast Region has mixed units that may carry IH, Investigations and/or OOH cases. Section 11 in South Region (Yuma) has workers assigned to carry IH cases.

⁻ During SFY2022, methodology of utilizing a 50/50 split for determing FTE assignments for investigation and ongoing Child Safety Specialists at the Section level was discontinued. Specific assignements are now based on the designations of their specific role as denoted in HRIS. However, Specialists in a trainee status are accounted for in FTE figures in each section with an equal distribution of 66% caseload. Data produced for December 2021 was updated from prior reports using this methodology.

⁻ The Department continues to diligently address data quality issues and will continue to update data as issues are identified and resolved. This data element will be updated and resubmitted in future iterations of this report.
