

Vaccine Billing Under VFC in Arizona's Medicaid System – Quite a Bit Has Changed!

With the changes under the ACA, both the specific vaccine code and the vaccine administration code must be reported by all providers reporting vaccine administration services.

- If the vaccine is provided through the VFC program, the SL modifier must be added to both the vaccine code **and** the vaccine administration code. Do not add the SL modifier to vaccine and administration codes used to report services provided to members who are over 18 years of age or for vaccines not covered under the VFC program administered to children.
- CPT codes identifying the vaccine or toxoid given under the VFC program should be identified with the appropriate CPT code to identify the vaccine, the SL modifier, and the charge listed as \$0.00.

CMS has added numerous code pairs to the Correct Coding Initiative (CCI) list of codes Procedure to Procedure code edits. These new edits, effective 1/1/13, pair the vaccine administration codes (90460, 90461, and 90471-90474) with the E&M codes. These CCI edits do not allow both the vaccine administration service and the E&M service to be paid for the same date of service unless the E&M service is identified with modifier 25. AHCCCS and CMDP must adopt these CCI edits. Providers administering vaccines and performing an E&M service on the same date of service must add modifier 25 to the E&M code. Modifier 25 is not added to the vaccine administration codes.

REMINDER: these billing instructions are ONLY for vaccines through the Vaccine for Children (VFC) program administered to recipients 18 years or younger.

Vaccine Administration Codes: (SL is state supplied vaccine)

Code	Description
90460 SL	Immunization Administration Through 18 Years Of Age Via Any Route Of Administration, With Counseling By Physician or Other Qualified Health Care Professional ; <ul style="list-style-type: none">• First Or Only Component Of Each Vaccine Or Toxoid Administered• If more than one vaccine/toxoid is included in a single injection, the additional toxoids should be identified with the appropriate CPT code
90461 SL	Immunization Administration Through 18 Years Of Age Via Any Route Of Administration, With Counseling By Physician Or Other Qualified Health Care Professional ; <ul style="list-style-type: none">• Each Additional Vaccine Or Toxoid Component Administered - List Separately In Addition To Code For Primary

	<p>Procedure</p> <ul style="list-style-type: none"> Providers should not separate vaccine toxoids typically administered together into separate syringes to report multiple vaccine administration codes.
90471 SL	<p>Immunization Administration (Includes Percutaneous, Intradermal, Subcutaneous, or Intramuscular Injections);</p> <ul style="list-style-type: none"> 1 Vaccine - Single or Combination Vaccine/Toxoid
90472 SL	<p>Immunization Administration (Includes Percutaneous, Intradermal, Subcutaneous, Or Intramuscular Injections);</p> <ul style="list-style-type: none"> Each Additional Vaccine (Single Or Combination Vaccine/Toxoid) (List Separately In Addition To Code For Primary Procedure)
90473 SL	<p>Immunization Administration By Intranasal Or Oral Route; 1 Vaccine (Single Or Combination Vaccine/Toxoid)</p>
90474 SL	<p>Immunization Administration By Intranasal Or Oral Route; Each Additional Vaccine (Single Or Combination Vaccine/Toxoid) (List Separately In Addition To Code For Primary Procedure)</p>

Arizona VFC Vaccine Billing 2013

Vaccine	Brandname/ Tradename	NDC	Packaging	Manufacturer	CPT
DTaP	Daptacel®	49281-0286-10	10 pack - 1 dose vials	Sanofi Pasteur	90700 SL
DTaP	Infanrix®	58160-0810-11	10 pack - 1 dose vials	GlaxoSmithKline	90700 SL
		58160-0810-52	10 pack - 1 dose T-L syringes. No Needle
